Product Detail

TreeDiaper® TD48R, Round Shape (for plants of ~24" rootball)

Model#1048vA

This TreeDiaper® TD48 Advanced Hydration System mat is great for 2-4 inch caliper trees, whose rootball are in the range 25-33". Consider 3-4 years of growth prior to the tree's establishment. For trees larger trees, use more than one unit for each tree. We recommend covering a circle area twice the rootball's diameter.

Simply soak the mat in water to get it started, then place it around your plants. Its user-friendly circular shape consisting of four quarters is designed to be placed on top of various types of soil. If you prefer a natural look, just add mulch on top of the mat. Because the TreeDiaper® treemat is made from durable materials, it can be used for years!

Dimensions:	48 in. diameter
Materials:	Plastic fabrics and super absorbent polymer
Shape:	Round
Product Weight:	1.5 lbs.
Color/finish:	Top - black / Bottom - light grey.
Plant Caliper/Selection:	4 inch
