Artak and Dave-

The OLRSM has received the photos documenting compliance with the ELUR requirements. While the Department waits for the City's approval of the revised plan, please make every effort to maintain the fencing and signage restricting access.

Jeff

Hi Jeff,

The owner of the referenced property (Artak Avagyan) sent me the attached photographs documenting his efforts to implement the suggestions LSE made in the annual ELUR compliance evaluation we submitted to you on August 31, 2022. These included erection of a snow fence and posting of no trespassing signs.

Based on the annual ELUR compliance evaluation, soil pile characterization & implementation of our recommendations, can the Department issue a short letter or email acknowledging to Art that the Site is currently in compliance with the terms/conditions of the ELUR? The City is looking for that as a condition of any pending approvals.

Thanks, Dave
