Date: August 30, 2018

Subj: Hughes Associates, Inc.

The City of Warwick, with Council approval, has engaged Hughes Associates under Bid 2014-274 to assess and design changes needed to bring all City-owned buildings up to current fire codes. Upon the initial contract award, the City did not have ownership of the Cooper Building. As plans moved forward to open the building as a community center, the City was required to appear before the State Fire Board of Review to discuss usage, plans and solutions for the building. Under the previous department director, Hughes Associates was authorized to develop a comprehensive plan pertaining to the current building fire codes based on the use and occupancy and present it to the review board on the City's behalf. Therefore, due to the additional work that was requested of the vendor outside the original scope of the project, this department is requesting an alteration to contract.

Please consider this memo a request for Sec. 6-12, Alteration to Contract, to increase the award for Hughes Associates, Inc. in the amount of \$5,555, bringing the contract total to \$274,840.

The City of Warwick, with Council approval, has engaged Hughes Associates to assess and design recommended changes needed to bring all City-owned buildings up to current fire codes. Upon the initial contract award, the City did not have ownership of the Cooper Building. As plans move forward to open the building as a community center, the City is required to have sprinklers installed in the all-purpose room as it is considered a place of assembly. It should be noted that the Water Department has installed the necessary water line from the street into the building, a savings to the City. Therefore, due to the additional sprinkler design of this building outside the original scope of the project, this department is requesting an alteration to contract.

Please consider this memo a request for Sec. 6-12, Alteration to Contract, to increase the award for Hughes Associates, Inc. in the amount of \$5,000, bringing the contract total to \$269,285.

Re: Bid2018-133 Annual Maintenance & Repair of Traffic Lights, Street Lights & Pole Lights

The City Council awarded the above in the amount of \$35,000. This department utilizes those funds for insurance accidents, as well as repairs necessary to roadway traffic control signals and lights at ball fields. There was a serious safety issue at the Mickey Steven Sports Complex during the spring/summer baseball season, making it a dangerous situation for the youth that were utilizing the fields for their games. This repair was authorized by the previous director and this department is in receipt of the final invoice. Because of this, the department is requesting to increase the cap of the bid by the invoice amount to pay the awarded vendor.

Please consider this memo a request for Sec. 6-12, alteration to contract, of the City Charter to increase the award to James J O'Rourke in the amount of \$11,923.75. This work was completed in fiscal year 2018 and will be charged to those funds. This bid expires on October 24, 2018.

Subj: Bid2018-133 Traffic Light Maintenance

The above was awarded by the City Council and capped at \$15,000.00. This bid expires on October 24, 2018. This department is requesting an increase of the awarded amount due to the replacement of a decorative light in Conimicut that was downed from the wind storm. The Trust has already reimbursed the City for this light as it is in excess of \$11,000 for the light replacement and labor. It has also come to the attention of this department that a decorative light pole was involved in an accident in Pawtuxet Village recently and that will need replacement. This department is seeking reimbursement from the involved party's insurance company. As well, this department must have authorization for traffic light repairs as necessary in the interest of public safety.

Please consider this memo a request for Sec. 6-12, Alteration to Contract of the City Charter increasing the awarded amount to \$35,000, an increase of \$20,000 for the abovementioned reasons.

MATHEW J. SOLITRO
DIRECTOR

To: Patricia Peshka, Purchasing Agent
From: Mathew Solitro, Public Works Director *MS*
Date: August 29, 2018
Subj: Emergency Refrigerant Purchase Thayer Arena

This department is starting the system for the front rink for the fall and winter season. There is not enough refrigerant to properly run the system. It is estimated that 900 pounds of RS-45 it required. Without the system being fully charged, with the current warm outdoor temperatures, the surface will not stay frozen for an extended period while waiting for bidding and approvals to affect the repair. Failure of the ice will result in the loss of revenue to the City, scheduled programming (including the Warwick Figure Skaters, Warwick Junior Hockey and tournaments, as well as group rentals, learn to skate programs and public skating). The contracted HVAC repair vendor could purchase the material on behalf of the City per the contract, however, the City will pay a 20 percent markup resulting in approximately an additional \$1600 - \$2000 unnecessary expense when it can purchase purchased direct by the City from the manufacturer. The cylinders are 24 pounds at a cost of \$215.76 per cylinder, and a shipping cost of \$125.00, for a total of \$8,323.88. It is not in the best interest to delay this purchase for the aforementioned reasons. It should also be noted that this vendor is manufacturer of this material.

Please consider this memo a request for an exception to notice under Sec. 56-6 of the Warwick Code for Comstar International, Inc. in the amount of \$8,323.88 for the purchase of (38) 24-lb refrigerant cylinders, including shipping costs. This request will be a one-time purchase and no contract period is required.

Re: Request for Spending Authorization; 56-6
Recruit Psychological Exams
Funding Source: Budget Code 30-335 Medical Examinations

Dear Ms. Peshka:

During the recruitment and hiring process, the department is required to have each eligible candidate given a psychological evaluation. Currently the only P.O.S.T. certified evaluator is Dr. Patricia Gallagher at the University Of Rhode Island Office Of Strategic Initiatives. The current cost for the evaluation is \$600 per person and has typically been paid by voucher as needed. Due to the increase in hiring and the costs associated with the purchase we feel it is prudent to receive Council spending authorization.

During the next (1) one year period we anticipate hiring approximately 12 officers. This is taking into consideration the 6 openings as well as anticipated retirements within the next 12 months.

Therefore we request, under the provisions of City Ordinance 56-6, "Exception to Notice Requirement" to expend monies, not to exceed \$7,200.00 for the purposes of obtaining recruit psychological exams from The University of Rhode Island. Funding would come from Police Operating budget 30-335 Medical Examinations

This contract would be for a 1 year period commencing at the date of authorization.

Please contact me should you have any questions.

Mrs. Patricia Peshka, Purchasing Agent
Warwick City Hall
3275 Post Road
Warwick, RI 02886

Request for Spending Authorization
City Ordinance 56-6 Exception to bid (sole source vendor)
OnSolve Intermediate Holding Company, CodeRED Notification System

Dear Mrs. Peshka,

As the city's Emergency Management Director, I am seeking to renew the CodeRED notification system's contract under the provisions of ordinance 56-6, exception to bid, as the company who manages the system OnSolve Intermediate Holding Company, 780 West Granada Blvd, Ormond Beach, FL 32174 is the sole source vendor for the system.

The CodeRED system is utilized throughout the State of Rhode Island under the management of the Rhode Island Emergency Management Agency (RIEMA). RIEMA has entered into an agreement with this sole source vendor to provide the CodeRED emergency notification system to all cities and towns. The annual cost of the system to the City of Warwick is \$9,500 to be paid by the city should this request be approved.

This notification system has been in use by the City of Warwick since 2014. It has proven to be a valuable resource to notify the community of announcements relating to storms, emergency conditions and utility service announcements. Citizens are able to sign-up to receive notifications free of charge to maximize use of system.

The contract covers up to five licensed system users who can access the system and utilize its notification capabilities. This system is web based with access through the internet and a cellular application.

The total amount being requested is **\$9,500** and will cover system use from 10/03/2018 through 10/02/2019.

If approved, financing for the CodeRED Notification System would come from the Warwick Emergency Management Budget, Code # 34-354.

The current contract expires on 10/02/2018. If approved, this contract would expire on 10/02/2019.

Please feel free to contact me if you have any questions.

Respectfully,

A handwritten signature in black ink, appearing to read "Rick Rathbun".

Major Rick Rathbun
Emergency Management Director

CodeRED

OnSolve is confident that our CodeRED mass notification solution is the ideal fit for your organization. We understand the critical nature of your mass notification project requires not only a fully functional system, but an experienced, reliable vendor capable of continuing a strong partnership with your organization.

OnSolve has been providing high-speed, high-performance, reliable mass notification solutions to worldwide organizations for nearly 20 years. OnSolve has the financial resources, engineering capabilities, support structure and knowledge to support your most cost effective and advanced mass notification solution.

OnSolve provides a suite of diverse, flexible cloud-based communication products that exchange critical and non-critical information quickly and efficiently, to a variety of clients such as:

GOVERNMENT

Government agencies of all types and sizes can play a role ensuring the safety and security of people and property through both natural and man-made emergencies.

SMALL & MEDIUM BUSINESS

Advanced communications tools that connect small and medium-sized business with customers, partners and employees to ensure companies function continuously and profitably.

ENTERPRISE

Complex, global companies with highly mobile work forces must ensure every stakeholder has the information needed to make effective, timely decisions about issues large and small.

OnSolve's solutions provide an application programming interface (API), allowing for integrations with other programs, such as emergency management systems, computer-aided dispatch and others, you may require.

OnSolve welcomes the opportunity to speak with you on why CodeRED mass notification solution will continue to offer the most value to your organization.

Together, let's maintain a lasting partnership dedicated to the success of your mass notification solution.

ONSOLVE.COM

Executive Summary

Beginning in 1998, CodeRED from OnSolve implemented its critical emergency notification system giving organizations the ability to deliver critical and non-critical mass notifications to residents, staff, and stakeholders reliably and efficiently.

OnSolve has invested millions of dollars into our triple-redundant, fully monitored and secure infrastructure, which powers our CodeRED emergency mass notification solution.

OnSolve understands your organization needs:

- A vendor that offers a high-speed, high-performance, mass notification solution.
- A solution that maintains the highest levels of reliability, speed and anticipates client base growth.
- A solution that allows for integrations with other programs.
- A vendor that offers a fully-compliant IPAWS solution.
- A solution that will instantly send critical and non-critical alerts through multiple communication channels simultaneously to reach your intended audience.

Regardless of the organization's size or mission, CodeRED's features set our clients above the rest.

OnSolve serves all levels of government, energy companies, corporate businesses, manufacturing, healthcare and retail businesses.

Our team of highly accomplished professionals have decades of combined experience in the mass emergency notification industry. OnSolve's team will consistently strive to innovate products ensuring our clients maintain the most reliable, technically advanced mass notification solution.

OnSolve's technological strength and financial stability are exhibited by the company's success and longevity demonstrating the creation, exploration and development of mass communications.

OnSolve's CodeRED mass notification solution has been battle tested and relied upon during some of the nation's most recognizable events over the past decade.

The CodeRED Solution

CodeRED™

Easy, powerful and reliable—The CodeRED solution provides an intuitive message creation and dissemination process with the ability to distribute an unlimited amount of messages through a variety of delivery methods including landline, VoIP, cell phone, SMS text, email, CodeRED Mobile Alert app, IPAWS, social media networks, website widgets, RSS and more.

In addition, notifications can be sent to any combination of individuals and/or groups and sub-groups. Designated administrators can group contacts as desired, allowing for query-based notifications, targeting messages by defined criteria or by geographic location.

OnSolve developed the easy to use, reliable and affordable CodeRED mass notification system to reach staff, stakeholders and customers with their emergency and/or routine operations messages.

THE CODERED DIFFERENCE

- Easy to use Software-as-a-Service (SaaS) based technology.
- Reliable message delivery.
- Automated weather alerts.
- Triple redundant infrastructure.
- Mobile launcher and alerts for iPhone® and Android® devices.
- Authorized Telecommunications Service Priority service vendor.
- 24/7/365 live client support.
- True two-way message capabilities.

OnSolve employs a triple-redundant (Active-Active-Active) configuration with built-in, automatic rollover capabilities.

The CodeRED Solution CONTINUED

The CodeRED system was designed to be easy to use, even under the most strenuous of conditions. For example, expecting use under pressure, OnSolve built the feature rich interface with a simple three-step process to initiate critical and non-critical communications.

Two Unique Mobile Applications

The CodeRED solution provides for multiple, integrated mobile solutions to enhance communication initiatives and streamline operations:

CODERED MOBILE LAUNCHER APP

The CodeRED Mobile Launcher app allows organizations to quickly and easily build new or utilize saved scenarios then launch notifications via all modes of dissemination.

CODERED MOBILE ALERT APP

The CodeRED Mobile Alert app, allows the organization to contact those who are not in the database, as well as individuals who live outside the region. The CodeRED app is available for free download to any Android or iOS device.

Two-Way Messaging

The CodeRED solution offers Two-Way Messaging enhancing capabilities beyond those of simple text or email.

Social Media Capabilities

The CodeRED Mobile Alert App includes a social sharing feature. This allows recipients to promote emergency and general notifications such as severe weather warnings, missing persons, boil water advisories and more across their personal social media platforms.

Internal Group Notification

Through the designation of groups and sub-groups, the client can customize the CodeRED database to reach any combination of recipients desired.

Bulletin Board

The CodeRED solution provides the Bulletin Board feature to allow recording of messages that can be accessed by recipients.

Real-Time Reporting

The CodeRED system provides real-time statistics that can be viewed live during a call or at any time following the launch. This information is available for the life of the CodeRED contract.

Integrated Public Alert Warning System (IPAWS)

IPAWS

The CodeRED solution provides a fully-compliant IPAWS origination tool operational in all five IPAWS messaging methods, including WEA, EAS, NWEM HazCollect, Collaborative Operating Group (COG) to COG and the Public Alerts Feed.

The IPAWS origination tool is seamlessly integrated within the system interface and provides Single Sign-On (SSO) capability. Message initiators do not need to log in to another program or different interface, saving time and potentially, lives. During an emergency, public safety officials must provide the community with life-saving information quickly.

CODERED FEATURES FOR IPAWS:

One message, multiple channels – Instantly send emergency alerts through multiple communication channels simultaneously to reach the client’s intended audience.

Time savings – Reduce delays caused by activating multiple systems separately.

Reliability – Internet-based warnings remain steadfast where other communication systems may become overloaded or fail.

Geo-targeting – This data standard supports the use of geospatial polygons to define hazard areas for more accurately targeted messages.

IPAWS Message Creation

CodeRED’s IPAWS Origination Tool allows message initiators to build alerts within the appropriate IPAWS environment (LIVE or JITC).

IPAWS Utilization of FIPS Code

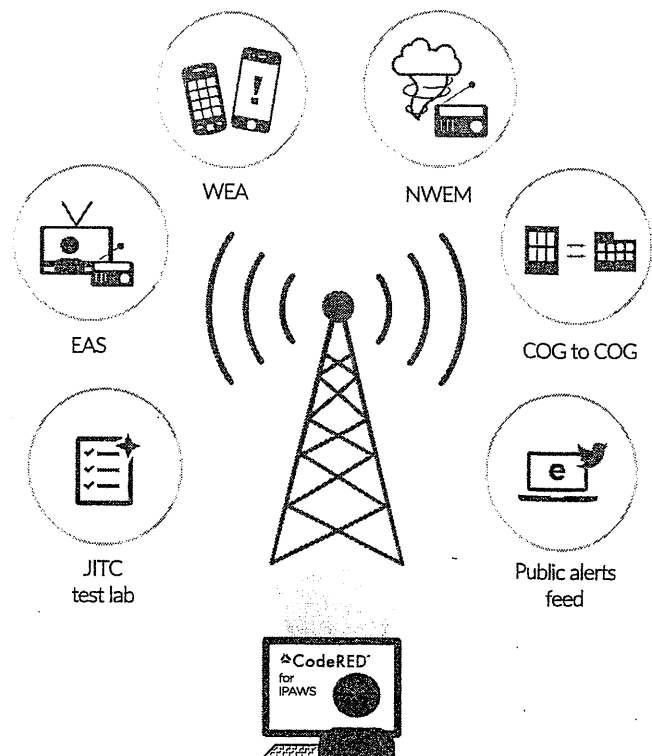

Target areas may be created through mapping, utilization of FIPS Code (multiple FIPS Codes are allowed), or COG. Message initiators will select the expirations date and time, and alert type(s).

IPAWS Scenario Recap

The message may then be created following FEMA guidelines. Multi-media messages may be included. Upon completion of the alert creation, a scenario recap is provided for final review.

IPAWS Launch Records – Statistical Data

Once the alert is launched, statistical data is available for review, and follow-up actions as needed.

OnSolve Project Support

FEMA

Microsoft

ONSOLVE CLIENT SUPPORT

OnSolve believes that "support" plays a critical part in providing a Software-as-a-Service solution, and provides live, 24/7/365 client services through our in-house team of highly-trained technicians.

OnSolve's 24/7/365 Network Operations Center (NOC) is tasked with persistent monitoring of the operational status of our infrastructure and system performance.

TRAINING

OnSolve offers a variety of training materials to ensure your organization is fully proficient in the system. These resources complement the intuitive design of CodeRED, resulting in an extremely user-friendly experience.

IMPLEMENTATION

The CodeRED solution is a Web-based SaaS service, making implementation simple.

ONSOLVE PROJECT TEAM

Our team of highly accomplished professionals have decades of combined experience in the mass emergency notification industry. OnSolve's team has the relevant, industry specific knowledge needed to ensure a successful implementation.

ONSOLVE CERTIFICATIONS

OnSolve has been approved by the Department of Homeland Security (DHS) for participation in their Telecommunications Service Priority (TSP) program. Sponsored by FEMA IPAWS, OnSolve received this approval reserved for organizations that provide national security and emergency preparedness services, giving federally qualified participants priority for provisioning and repair of their network during emergency situations.

Forward-Looking Technologies And Enhancements

2017 BCI CONTINUITY AND RESILIENCE INNOVATION AWARD

OnSolve was recognized in September 2017 at the Disaster Recovery Journal Fall World event as winner of the Business Continuity Institute (BCI) Continuity and Resilience Innovation 2017 Award. This is only one of seven regional awards recognized at the BCI Americas Awards annually. A month later, OnSolve took home the Global BCI Continuity and Resilience Innovation of The Year award for those same acknowledgments.

OnSolve received this prestigious honor for bringing a host of innovative product and service features to the market over the past year that enabled organizations to improve business continuity and resilience. Some of the innovations highlighted included advanced geo-fencing, two-way messaging, ad hoc reporting and language translation.

CIO100

2016 CIO AWARD FOR IT-BUSINESS INNOVATION

OnSolve's commitment to innovation is exemplified by receiving the 2016 CIO Award for IT-Business Innovation. The 29th annual CIO Award program recognizes organizations around the world that exemplify the highest level of operational and strategic excellence in Information Technology (IT).

OnSolve product managers regularly communicate across our national client base to determine the most advantageous new technologies. As a result of this process, more than 80% of system enhancements come from user requests and feedback. All new features reflect the best practices of agencies across North America.

OnSolve also establishes meetings in conjunction with local and regional conferences to confer with agencies across the country. During each conference, participants provide input on system usage and desired features. New features and product roll outs are presented, with hands-on training administered to ensure agency representatives are fully proficient in their use of the system. Client panels are also conducted to glean lessons-learned and best practices.

New developments and system enhancements are based on our continual research into technologies that will optimize system functionality and incorporate new and useful applications for our clients. Enhancements are specifically designed to address the expressed needs of our clients, who play an active role in the product development process. For example, OnSolve has organized a Client Advisory Board that holds an annual meeting to discuss the latest developments and services.

Important CodeRED Features

CODERED LAUNCHER APP

Send notifications on-the-go

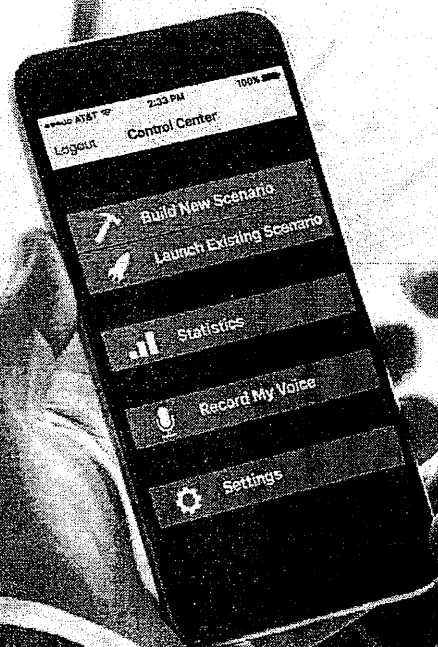

The CodeRED Launcher app gives authorized users the ability to send notifications directly from their smartphone or tablet. Within seconds, users can send notifications to contacts in specific geographic areas through the app.

LAUNCH A NOTIFICATION FROM ANYWHERE

The CodeRED Launcher App puts the power in your hands to create and send messages within seconds directly from your smartphone. The solution is ideally suited for use in the field or for ad hoc community and staff alerts. It allows authorized users to start and stop critical message campaigns from any device, track campaign statistics upon completion of alerts to show the results of each completion attempt, and define precise locations for critical message delivery through the enhanced mapping interface. Using system credentials, only users with the authority to send messages to the public or within their organization may launch alerts.

HOW IT WORKS:

- The app guides the user through the notification process, allowing a new message to be created or an existing scenario that has already saved in the system to be activated. Users may also view statistics, record voice messages via the device microphone and more.
- Authorized users can quickly and easily create a message and target desired recipients by selecting the appropriate audience based on event severity, defined groups and other qualifiers.
- Pinpoint the geographic area for your warning; the interface will display the targeted area and show how many contacts are within its boundaries.
- Select your message components and choose how your notification will be delivered. Dissemination paths include voice, text, email, the CodeRED Mobile Alert app, TDD/TTY, and more; all from a single user interface.

Important CodeRED Features CONTINUED

CODERED WEATHER WARNING

Automated Weather Warning

When severe weather strikes, seconds can make a difference in how people prepare and respond. Protect residents with automatic notifications delivered by CodeRED Weather Warning.

AUTOMATION ALERTS THE PUBLIC QUICKLY

CodeRED Weather Warnings are launched just moments after a bulletin has been issued by the National Weather Service (NWS) with no staff action required. This sophisticated feature of the CodeRED system takes pressure off of internal resources while continually ensuring citizens and staff that may be threatened by local, severe weather are notified and informed throughout a disruptive time.

"We had a tornado go through our city and CodeRED Weather Warning helped our citizens with early notification. Fortunately we didn't have any fatalities, but 300 homes were completely destroyed. CodeRED Weather Warning gave residents early warning with extra time to prepare."

FIRE CHIEF THOMAS GRIFFITH, CITY OF LANCASTER, TX

NATIONAL WEATHER SERVICE

POLYGON METHODOLOGY

Using information provided by NWS to define a storm's direction and speed, CodeRED Weather Warning geographically targets notifications to reach only those in the projected path of the storm, increasing relevance and reducing false alarms.

Types of warnings issued are varied, and each is available to areas prone to specific weather conditions, including:

- Severe thunderstorms
- Flash floods
- Tornadoes
- Winter storms
- Tsunamis

Important CodeRED Features CONTINUED

CODERED TWO-WAY MESSAGING

Sometimes you need the ability to interact directly with residents, staff and stakeholders and allow responses to conduct two-way dialogue by email and text.

TWO-WAY MESSAGING GIVES YOU THE ABILITY TO:

Send messages through a web-based solution
See when a message has been opened, in what format (email or text) and the response (if applicable).

Enable polling and track responses via a simple survey

Staff and residents can receive and respond to messages featuring a simple survey with yes or no responses. If text responses are enabled, recipients may respond with a personalized message.

View and track all responses

Real-time responses allow visibility to the most up-to-date information.

Set a pre-defined expiration time

Determine how long a notification is valid, ranging from 10 minutes up to 24 hours.

Attach documents with your communication

Attachments displayed by name can provide additional pertinent information to recipients (i.e., a photo of a missing individual, event fliers, maps of affected areas, etc.).

Use efficient character counts with shortened URLs

Recipients receive a complete message that has not been truncated by character limitations.

Employ a responsive design that accommodates multiple device types

Messages are displayed consistently across all device types for a streamlined user experience.

Read the CodeRED Case studies—hear it from your peers.

Important CodeRED Features CONTINUED

CODERED MOBILE ALERT APP

Geo-targeted alerts for safety notifications

The CodeRED® Mobile Alert app provides advanced, real-time, location-specific alerts to notify subscribers of critical communications as they travel across the United States and Canada.

HOW THE CODERED MOBILE ALERT APP WORKS

The Mobile Alert app is simple to use. As a resident or visitor, you can download the free app on your smartphone. When a public safety official initiates a notification to the app using CodeRED, you'll receive an alert directly to your phone.

BENEFITS OF THE CODERED MOBILE ALERT APP

- **Free download** – Protect residents and visitors traveling across CodeRED communities.
- **Customized user experience** – Subscribers choose the types of alerts they wish to receive.
- **Detailed notifications** – Messages can include text and/or audio and feature a map with location of the warning area.
- **Unlimited uses** – Use the app to reach residents and visitors at shopping centers, fairs, festivals, concerts or other events that may bring people from different communities together.
- **Easy to use** – Send mobile alerts via the same single CodeRED interface used to deliver voice, text, email, IPAWS and social media messages.
- **Function** – Location-based alerts.
- **Interface** – Ad-free, easy-to-use Interactive map with color-coded icons, available on iOS and Android devices.
- **Settings** – Optional audible hands-free driving, establish personal warning radius and view optional weather feeds.
- **Uses** – Emergency alerts, severe weather warning, missing persons notifications and more.

Sheriffs use CodeRED to help in wildfire evacuations and to find missing people

Rapid, reliable notification keeps lines of communication within communities open in diverse situations.

Customer Profile:

Yavapai County is near the center of the U.S. state of Arizona, and is often subject to wildfires that can endanger lives and property.

Problem:

When the Tenderfoot Fire erupted, authorities needed a way to alert residents of evacuation and direct them to shelter.

Solution:

Using CodeRED, sheriffs alerted residents about the fire danger, potentially saving lives in the process.

Benefit:

The people of Yavapai County can rest assured that they will quickly be provided with critical information when danger threatens.

The Tenderfoot Fire threatens

On June 8, 2016, a human-caused brush fire in Yarnell, Arizona began around 3:15pm and soon exploded into burning 600 acres, fanned by 20mph winds. Termed the Tenderfoot Fire, the blaze burned through three structures by Wednesday night. Highway 89 was closed, 1,050 customers were without power and the fire threatened communications equipment used by the sheriff's deputies.

The Problem: Alerting the community of danger

The Yavapai County Sheriff's office needed a way to alert and direct the entire towns of Yarnell and Peeples Valley to evacuate. This situation was especially alarming because in 2013, a Yarnell firestorm destroyed more than 100 homes and killed 19 Prescott Hot Shot firefighters who were attempting to protect the town. No one wanted a repeat performance of that disaster.

The Solution: CodeRED

Using the CodeRED® notification system, Yavapai County sheriffs were able to alert all citizens quickly, and when the fire danger ended, they sent another alert to let everyone know it was safe to return home.

Since that time, Yavapai County has experienced more wild fires as well as missing person incidents and have successfully used CodeRED to assist a local police agency with evacuations due to another fire bearing down.

On June 19, 2016, an 86-year-old woman with dementia was reported missing around 6pm. The Prescott Police Department used the CodeRED system to alert residents of the missing woman along with her physical description. The system made over 1,600 calls, and the Yavapai County Search and Rescue K-9 team was able to locate the missing woman around 9:45pm that evening near Willow Lake.

How local government and law enforcement can use CodeRED:

- Keep crisis management plans up-to-date with pre-created notification scenarios identifying key communities to target
- Issue automated emergency alerts that notify civilians in the path of fire, storm or other danger
- Activate evacuation plans and guide and direct residents to safety
- Alert local emergency responders to assist during a disaster

The end result

The CodeRED system is a year-round, critical resource for the Yavapai County Sheriff's Office. Following the June 2016 fire and several other incidents, sheriff's personnel heard from many of the town's residents who expressed great appreciation for the important notifications from CodeRED.

Boston agencies relied on CodeRED for post-blast crisis communications following bombing

Less than thirty minutes after two bombs struck near the finish line of the Boston Marathon in April 2013, multiple agencies within the Boston area used the massive dialing infrastructure behind CodeRED to quickly send critical communications to both runners and the public.

Customer Profile:

The 2013 Boston Marathon suffered a horrific terrorist bombing that killed several people and injured hundreds of others.

Problem:

Many businesses and agencies needed to alert runners, spectators and staff to direct them to safety while helping emergency responders help the injured.

Solution:

Using CodeRED, many organizations were able to successfully communicate during periods of network congestion throughout the tense days-long event.

Benefit:

Working together as a fully informed community, the city of Boston was able to find the culprits and guide law enforcement in their capture.

A tragic attack in the city of patriots

On April 15, 2013, two homemade bombs exploded just seconds apart near the finish line of the annual Boston Marathon, killing three people and injuring hundreds of others, including 16 who lost limbs. In the first 24 hours following the incident, more than 228,000 calls, tens of thousands of texts and emails, in addition to 700 CodeRED® Mobile Alert app notifications kept residents informed of critical public safety messages specific to their areas.

The Problem: How to reach many people at once

For one client who relies on the CodeRED high-speed notification system, part of the marathon path took runners directly through his town of Newton, Mass. "The Boston Marathon goes through Newton, and it was enormously helpful to be able to deploy the CodeRED system in specific geographic areas on marathon day," said Lt. Bruce Apotheker, spokesperson for the Newton Police Department. "When the state advised a lockdown of Newton and neighboring communities on Friday, April 19th, the system was very useful in helping us to keep our residents informed throughout the day."

The Solution: CodeRED

Brookline Police Department in Massachusetts also relied on CodeRED technology to deliver nearly 30,000 telephone calls specifically related to the Boston Marathon explosion. Their EMT Division initiated calls before 3:15 p.m., less than a half hour after the bombs exploded near the finish line.

The following day, the Massachusetts Institute of Technology (MIT) used the CodeRED system to notify students, faculty and staff of a suspicious package on campus. More than 20,000 calls were launched in 11 minutes and 18,000 text messages were sent in three minutes, allowing MIT to communicate with their campus community during a time of heightened awareness and vigilance. MIT used the system to send a follow-up all-clear message 15 minutes later, and the entire campus was again notified in just over 10 minutes.

The system saw critical client use Thursday and Friday that week as MIT launched thousands of text messages almost every hour to students, faculty and staff related to an active shooter on campus, suspicious package reported, class cancellations and to stay home and indoors. Messages were received in less than three minutes of initial launch.

CodeRED clients across Massachusetts including Lexington, Cambridge, Newton, Arlington and Plymouth used the system to engage SWAT teams and deployments, issue shelter-in-place warnings to the community and alert city transportation and others of office closures. Before noon on Friday, clients had used the CodeRED infrastructure to deliver nearly two million calls, hundreds of thousands of text and email notifications, and thousands of notifications through the CodeRED Mobile Alert for location-specific smartphone alerts.

How local government and law enforcement can use CodeRED:

- Keep crisis management plans up-to-date with pre-created notification scenarios identifying key communities to target
- Issue automated emergency alerts that notify civilians in the path of fire, storm or other danger
- Activate evacuation plans and guide and direct residents to safety
- Alert local emergency responders to assist during a disaster

The end result

Because the CodeRED system is monitored 24/7 by live, in-house technical and client support teams, calls were initiated seamlessly, even during reported network congestion at critical times Monday, overnight Thursday and through Friday.

"When the state advised a lockdown of Newton and neighboring communities on Friday, April 19th, the system was very useful in helping us to keep our residents informed throughout the day."

Lt. Bruce Apotheker
Spokesperson for the Newton
Police Department

Lost child found quickly with help from CodeRED notification system

Rapid, reliable notification keeps residents in communication when a child's life could be at stake.

Customer Profile:

Belmont County is located in the state of Ohio and has a population of roughly 70,400 people.

Problem:

When a seven-year-old child went missing and the usual services couldn't quickly find him, authorities wanted to engage residents to help.

Solution:

Using CodeRED, residents were alerted about the missing boy and he was quickly found to be at a neighbor's house, safe and sound.

Benefit:

Emergency responders have a quick and reliable way to target and reach residents who can aid in searches.

A boy goes missing and a search begins

On the night of May 12, 2016 around 6:00 pm, authorities in Belmont County, Ohio, received a call about a missing seven-year-old boy in a rural area of the county. The initial report indicated that the child might have been taken by the child's father, who at the time, was residing in a different location. Law enforcement successfully located the child's father after just 15 minutes and determined that the child was not with him. The search widened.

The Problem: Reaching responders in different agencies

Belmont County Fire and emergency medical services (EMS) and utility terrain vehicles (UTVs) from surrounding fire departments were dispatched to assist with the search. When law enforcement, fire and EMS services realized the search of the immediate area was not returning any results, they knew they needed to issue a community alert and expand their search area.

The Solution: CodeRED

A fire chief in one of the local responding fire departments, who also is a supervisor of the County's 9-1-1 system, quickly deployed the CodeRED® Launcher application. This way he was able to send an alert from his tablet while in the fire apparatus helping with the search.

Just seven minutes later, a call was received at the dispatch center from a neighbor who said the child was at his house. The neighbor

was not aware that the boy's family did not know his whereabouts. Units responded to the call and the child was successfully reunited with his family. The family is grateful, and now all families in the county are reassured that there is a system in place in case other residents go missing.

How local government and law enforcement can use CodeRED:

- Keep crisis management plans up-to-date with pre-created notification scenarios identifying key communities to target
- Issue automated emergency alerts that notify civilians in the path of fire, storm or other danger
- Activate evacuation plans and guide and direct residents to safety
- Alert local emergency responders to assist during a disaster

The end result

"While this isn't the first incident of this type that CodeRED has helped in our county, it was one that definitely helped to expedite an end to a very scary situation for the family," said Bryan Minder, ENP director of Belmont County 9-1-1. "CodeRED is an invaluable tool for Belmont County. I can't express how happy we are to use your product."

Notification software successfully used to alert and inform residents of local crime spree

Rapid, reliable notification keeps residents informed with crime prevention tips when thefts are on the rise.

Customer Profile:

Shawnee County is located in northeast Kansas, in the central US, and is the third-most populous county in its state.

Problem:

Shawnee County authorities wanted to alert the citizenry to a rash of mail and property theft.

Solution:

Using CodeRED, authorities alerted residents to take extra precautions with their mail, vehicles and other possessions.

Benefit:

The people of Shawnee County are now armed with important information and tips to help them protect their property and avoid being victimized.

Community awareness foils criminals

A recent rash of mail theft, vehicle burglaries and vehicle thefts prompted the Shawnee County Sheriff's Office to issue a countywide alert to help inform and protect residents. The Sheriff's office indicated that they had seen an increase in crimes throughout all parts of Shawnee County and wanted to warn the populace to be on guard.

The Problem: How to reach many people at once

The Sheriff's office wanted to remind residents to place outgoing mail in post office drop boxes and to collect all mail and packages delivered to their homes as soon as possible, as well as provide other crime prevention tips. "Criminals are following mail carriers and removing mail from mailboxes, looking for any information to steal your identity or financial information," the alert stated. "Criminals are also taking packages dropped off on citizens' doorsteps."

The Solution: CodeRED

Authorities used the CodeRED® alerting system to notify residents to guard their mail deliveries, keep vehicles locked, and to not leave spare keys or property inside vehicles. They advised folks that, "Criminals are removing loose items found in vehicles including electronics, currency, purses, backpacks, firearms, garage door openers, keys and other miscellaneous items," according to the alert issued.

Guidance went on to remind residents, "Burglars may approach a residence and if the homeowner is home, then if confronted, make up an excuse for being on the property, such as they are looking for looking for someone else." The Sheriff's office asked residents to report all incidences immediately to law enforcement and provide details and subject descriptions, including vehicle make, model and tag numbers when possible.

How local government and law enforcement can use CodeRED:

- Keep crisis management plans up-to-date with pre-created notification scenarios identifying key communities to target
- Issue automated emergency alerts that notify civilians in the path of fire, storm or other danger
- Activate evacuation plans and guide and direct residents to safety
- Alert local emergency responders to assist during a disaster

The end result

Shawnee County has used CodeRED to bring awareness to criminal activity, which has likely prevented many people from falling victim to crime. They know that authorities are looking out for them, and that in the case of even more serious crimes that could threaten them or their families, help is nearby.

DIRECTOR

To: Patricia Peshka, Purchasing Agent

From: Mathew Solitro, Director of Public Works *MS*

Date: August 31, 2018

Subj: Dennis K. Burke, Inc.

The Automotive Division went out to bid and receives DEF (diesel exhaust fluid) on an automatic delivery. It had recently come to our attention it was being purchased from the wrong vendor on the bid (2018-105, Exp. 10/25/18), however, it has since been corrected. These purchases should have been from Ocean State Oil. Therefore, this department is requesting to pay the outstanding invoices for the deliveries received from this vendor in the amount of \$2,678.98. Please note that some of the invoices are included in this package. The remainder of the invoices have been verified by this department that they are still outstanding for the purchase of the materials and we are waiting for copies of said invoices that complete the request to be paid.

Please consider this memo a request for an exception to notice under Sec. 56-6 of the Warwick Code for Dennis K. Burke, Inc. in amount of \$2,678.98 for these purchases.

MATHEW SOLITRO
DIRECTOR

To: Patricia Peshka, Purchasing Agent

From: Mathew Solitro, Director of Public Works *MS (2/18)*

Date: August 31, 2018

Subj: Coastal International Trucks

The Automotivè Division sent one of the Sanitation vehicles to the above vendor under the assumption that it was covered for repairs as this vendor is on a bid (2018-314, Exp. 6/4/19), not understanding that this bid is solely for fire equipment. However, this repair would have been urgent as the fleet is experiencing a significant amount of repairs with the Sanitation vehicles which results in trash pick delays daily. This repair was initiated in fiscal year 2018 and has since been completed. Therefore, this department is requesting to pay the outstanding invoice in the amount of \$2,382.27.

Please consider this memo a request for an exception to notice under Sec. 56-6 of the Warwick Code for Coastal International Trucks in amount of \$2,382.27 for repairs to RS53. Please note that this is a one-time purchase.

Patricia Peshka
Purchasing Agent
City of Warwick
Warwick, RI 02886

Dear Ms. Peshka,

In accordance with City of Warwick Ordinance 56-10, The Warwick Fire Department is requesting to piggyback the State bid (MPA # 138) awarded to Keane Fire & Safety Equipment Co., Inc., 2112 Elmwood Ave. This bid will be extinguisher maintenance and repair. The State of RI has awarded the bid from July 1, 2018 through June 30, 2021.

The Fire Department would like to award this bid for a period of two years from the date of award. Total not to exceed \$2,400.00. The funds will come from budget code 35-340 service contracts. The previous bid 2016-249 expired on 6/30/18 .

Sincerely,

Marcel Fontenault Jr
Acting Chief of Department

KFB
