**CAREER OVERVIEW and VITAE**

I am a Warwick resident with a background including environmental geology, history, sociology, and land and water resource management. My wife is a Warwick native, and we have chosen to raise our family and make our home here. I am currently enrolled in a university post-graduate land and water resources management program. As such, issues of our local land and water resources have taken on extra importance to me. I highly value conservation, open space, and the outdoors. My education, work as an educator, and my history of volunteering with community outreach programs would well serve the Warwick Land Trust. I am an avid hiker, canoeist and boater.
