Questions will be sent in addendum format.

Respectively submitted,

Patricia A. Peshka  
Purchasing Agent

The City is looking for survey of one 3.5 acre parcel, not individual lots.

The price to flag wetlands and survey flags onto site plan, on the 3.5 acre lot is to be added as an option as a separate price.

Conservation Monumentation should be in the form of one granite marker at upland side and 1 iron pin in other upland side with appropriate monumentation on wetland side (southern side) at corners of 3.5 acre parcel. By appropriate, we mean something that will be able to withstand the tide and being submerged.

Survey should include 2' interval elevation contours.

The report is due 21 days after required documents are provided and a formal award.
