Microbes and Pollutants of Concern

Fecal coliform: in excess of 400 CFU/100 mL, Most Probable Number ("MPN/100 ml");

Male-specific Coliphage: equal to or greater than 50 plaque forming units per 100 milliliters ("pfu/100 ml");

Class AA, A, B, B1, B(a), or B1(a) waters- Enterococcus: greater than 61 colony forming units per 100 milliliters ("cfu/100 ml");

Class SA, SA(b), SB, SB1, SB(a), or SB1(a) waters- Enterococcus: greater than 104 cfu/100 ml;

Surfactants: equal to or greater than 0.25 milligrams per liter ("mg/l") via field kits, or 0.1 mg/l via laboratory analysis;

Ammonia: equal to or greater than 0.5 mg/l;

Total Phosphorus detection limit of 0.01 mg/L;

Total nitrogen detection limit of 0.01 mg/L.
